

# **GREASED LIGHTNING**

## **LUBE WASH**

3605 Hwy 157, LaCrosse (next to Red Lobster)

Greased Lightning (formerly Wonder Wash) has been exploring and researching future "green" initiatives since the business changed hands two years ago.

A few changes have already been made to incorporate more sustainable practices.

- New car washes were installed to conserve water, energy and the waste of excess cleaning agents.

- Waste oil recycling
- Bulk oil purchasing

While it is more environmentally friendly to have your vehicle washed at a service center instead of in your driveway because of run-off, Greased Lightning is in the process of weighing the possibility of a water reclaiming system to make it even more environmentally responsible.

Summer of 2009 there will be a waste oil furnace installed. This will allow waste oil we accumulate through the lube center to be used to heat the building. This is a great way to implement the recycling of waste oil.

Also in the plans for 2009 is to take upon the responsibility of purchasing and selling recycled oil to run in vehicles.

Researching the possibility of using phosphate free soaps.
