

## **Sand Lake Elementary School**

3600 Sand Lake Road

Holmen, WI 54636

[www.holmen.k12.wi.us](http://www.holmen.k12.wi.us)

**At the beginning of the school year we formed a “green” committee of staff and parents to explore the options our school has to “go green’.**

**This year we are proud to have a plastic and paper recycling program underway in our classrooms and in the staff lounge. Students are involved in collecting the recyclables and depositing them in proper receptacles.**

**There has been an ongoing awareness of energy use throughout the school. To help conserve energy, lights don’t come on until students arrive for the day, lights and computers are turned off when classrooms are not in use and the use of heating and air conditioning is kept to a minimum when school is not in session.**

### **Other projects the green committee is currently exploring are:**

-  Crayon recycling through crazycrayons.com which is a National crayon recycling program.**
-  Collecting drink pouches for a company that makes them into reusable bags of varying sizes and lunch bags.**
-  Recycling Ink Cartridges.**

**Our Earth Day Activities are as follows:**

**On April 22<sup>nd</sup> David HB Drake will present "What a Wonderful World". This presentation will include songs for the Earth, of other cultures, peace between people and recycling sing-a-longs.**

**Students will engage in earth-friendly activities ranging from cleaning up our school campus to learning more about helping our Earth.**

**Go'in Green!**

**We are looking forward to the future and teaching our children the importance of taking care of our Earth.**

**Recycle**

every day is  
earth day ♡
